### Profile

**About me:** I am promising, proactive, social, honest. Young programmer who is full of energy and ambitions. A perfectionist with a high level of responsibility. My strengths are good management and leadership skills, systematic focus, positive attitude, high degree of efficiency. I am looking for a career growth opportunity and friendly team to work with.

### Employment history

- ❖ **Java Software Engineer, ALTA MAR TOV (Kyiv. May 2020 – Nov 2020)**

Worked on creation, development and still of internet store for company in wholesale fish products

- ❖ **Java Software Engineer, ISolutions (Kyiv. May 2021 – Feb 2022)**

Worked on a project that was aimed to digitize urban infrastructures in order to improve, optimize and control all the life processes of cities. The core of the project was a CRM system responsible for the control and administration of a large amount of data. The CRM core was based on the idea of an ORM system with the possibility of client operation, in the development of which I participated. On top of the CRM system, submodules were built that were responsible for a specific branch of the city vitality/administration, which were able to interact with each other through the core.
